Sir:

INFORMATION DISCLOSURE STATEMENT UNDER 37 C.F.R. § 1.97(b)

Pursuant to 37 C.F.R. §§ 1.56 and 1.97(b), Applicants bring to the attention of the Examiner the documents listed on the attached PTO 1449. This Information Disclosure Statement is being filed before the mailing date of a first Office Action on the merits for the above-referenced application.

Copies of the listed documents, excluding the U.S. patents but including any copending non-published patent applications, are attached. This patent application was filed after June 30, 2003, and as indicated at 1276 OG 55, submission of U.S. published patent applications and issued patents is not required with this Information Disclosure Statement.

Applicants respectfully request that the Examiner consider the listed documents and indicate that they are considered by making appropriate notations on the attached form.

This submission does not represent that a search has been made or that no better art exists and does not constitute an admission that each or all of the listed documents are material or constitute "prior art." If the Examiner applies any of the documents as prior art against any claims in the application and Applicants determine that the cited documents do not constitute "prior art" under United States law, Applicants reserve the right to present to the Office the relevant facts and law regarding the appropriate status of such documents.

Applicants further reserve the right to take appropriate action to establish the patentability of the disclosed invention over the listed documents, should one or more of the documents be applied against the claims of the present application.

The undersigned has been given limited recognition under 37 C.F.R. § 10.9(b) to prosecute this patent application. A copy of the document granting limited recognition is enclosed herewith.
